

Shatoot Consultants

**Global Standards. Afghan-Led Experties.
Sustainable Impact.**

**SHATOOT
CONSULTANTS**

Who We Are

Shatoot Consultants combines international best practices with deep, on-the-ground expertise to provide comprehensive solutions across Afghanistan's humanitarian and development community. Legally registered with the Ministry of Commerce and Industry (**License #68015**), we are a trusted partner for prominent development agencies, NGOs, and public and private institutions. Our mission is to enhance the quality of life for Afghan communities through innovative research, transformative capacity building, and world-class technical assistance.

We translate this mission into action through our core capabilities:

Engineering
Design &
Consultancy

Organizational
Strengthening

Monitoring,
Evaluation &
Learning (MEL)

Community
Development &
Capacity Building

Why Shatoot

Context-Aware Technical Experties

Our team of master's and PhD-level professionals integrates deep academic rigor with extensive local experience. This fusion of theory and practice ensures that every project is built on both contextual intelligence and technical excellence.

Reliable Partner for High-Stake Projects

Trusted by the global and local organizations, from UN Agencies and INGOs to public institutions and international firms. Our lasting partnerships are built on a foundation of quality and reliability.

Impact-Focused and Community-Centered

We are your value-aligned partner, not just a service provider. We are committed to working with organizations and individuals dedicated to creating meaningful, sustainable public value for communities across Afghanistan.

Core Capabilities

Engineering Design and Consultancy

We provide end-to-end engineering consultancy, transforming project concepts into viable, resilient, and compliant realities.

- ◆ Planning and Feasibility Support
- ◆ Design and Engineering
- ◆ Project & Construction Management
- ◆ Research and Data Collection
- ◆ Environmental Engineering
- ◆ Energy Consulting
- ◆ Engineering Capacity Building

Organizational Strengthening

We empower institutions with the skills, processes, and leadership to excel.

- ◆ Organizational Assessment
- ◆ Strategic Planning
- ◆ Personal and Organizational Development Training
- ◆ Policy Development
- ◆ Technical Training
- ◆ Fundraising and Resources Mobilization

Community Dev & Capacity Building

We empower communities to lead their own development for lasting change.

- ◆ Participatory Needs Assessment
- ◆ Agricultural & Livelihood Training
- ◆ Natural Resources Management
- ◆ Gender & Social Inclusion
- ◆ Literacy Programs
- ◆ TVET Trainings

Monitoring, Evaluation & Learning

We transform data into insight and accountability into impact.

- ◆ Third-Party Monitoring (TPM)
- ◆ Impact Evaluations
- ◆ Baseline/Endline Surveys
- ◆ MEL Framework Design
- ◆ Data Management & Analysis

Strategic Advisory and Policy Dev

We craft the strategies, policies, and frameworks that build stronger, more resilient, and better-funded organizations.

- ◆ Organizational strategy formulation
- ◆ Policy drafting and institutional reform guidance
- ◆ Donor engagement and positioning strategies
- ◆ Governance and accountability frameworks
- ◆ Risk analysis and mitigation planning

Proven Impact Across Afghanistan

Water Security & Resource Management

Engineered hydrogeological solutions and sustainable water supply systems for the most remote regions in Farah, Nimroz, Kandahar, and other provinces, to safeguard vital community resources.

Clean Energy Transition

Enabled major development partners, including UN agencies, to adopt renewable energy through expert technical support, reducing carbon footprints and operational expenses while strengthening local technical expertise.

Women's Economic Empowerment

Equipped 840 women-led micro, small, and medium enterprises nationwide with customized business management and vocational training, fostering economic inclusion and growth.

Climate-Smart Agriculture

Trained 1000+ Afghan farmers in modern, climate-resilient agricultural practices to enhance productivity, sustainability, and food security.

Renewable Energy for Communities

Designed and delivered tailored solar home systems to provide clean, reliable electricity for displaced and vulnerable households across multiple provinces.

Organizational Capacity Building

Enhanced the operational excellence of national and international institutions through targeted training in leadership, management, and core technical functions.

Our People

Our team brings together **subject-matter experts**, **Fulbright scholars**, **PMP-certified project managers**, **highly-expert engineers**, and **senior consultants** with decades navigating Afghanistan's complex development landscape.

What sets us apart is not just our technical pedigree, but our collaborative ethos. We are approachable, down-to-earth individuals who listen carefully to understand your unique challenges to craft precisely tailored, technically robust solutions.

Partnering with **Shatoot** gives you access to this unique blend of academic excellence, practical field experience, and specialized knowledge, all focused on delivering measurable, sustainable impact.

Sectors

We are a public value organization, dedicated to enriching the lives of Afghans. Our work spans diverse sectors where we deliver technical excellence and sustainable solutions:

- **Humanitarian & Non-Profit**

Enhancing the effectiveness and visibility of programs through research, capacity building, and technical support.

- **Energy & Power**

Technical consulting, engineering, and capacity building support across solar, hydro, diesel, and grid infrastructure.

- **Water & Environment**

Clean water systems, wastewater treatment, and eco-friendly practices for public health and sustainability.

- **Transportation**

Planning, design, and supervision of roads, bridges, airports, and major infrastructure projects.

- **Buildings & Facilities**

Civil engineering, sustainable design, and project management for public, commercial, and residential structures.

- **Agriculture**

Strengthening value chains, promoting climate-smart practices, and supporting farmers through research and training.

Featured Clients:

Proudly trusted by the world's leading development and humanitarian actors to deliver in Afghanistan.

Get in Touch

Whether you have a **project in mind**, a **challenge to solve**, or a **question about our services**, we are here to listen and collaborate.
